DGMTS Drilling Department

Our drill rig equipment is highly maintained and presently consists of one ATV CME 55 and one truck mounted Mobile B56 drill rigs with capabilities to drill 200 feet deep holes using hollow-stem auger and mud rotary. All of our drill rigs are equipped with 250 to 350 gallon water tanks on-board. Our support equipment consists of service trucks, trailers, light towers, generators, and welding equipment.

Our drill rigs are equipped with the state-of-the-art Automatic SPT Hammer to sample the subsurface profile as drilling progresses.

Our soil and rock drilling capabilities also include undisturbed sampling in soil and NQ core drilling in rock.

Additionally, the drill rigs are equipped with drilling fluid pump for grouting as well as mud rotary drilling and/or rock coring.

Our drilling department also has concrete and asphalt coring machine.
